### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ferguson in view of Trainer.

With regard to claim 1, Ferguson discloses a swabbing tool that includes a mandrel 21 and swab cup 20 on the mandrel. However, Ferguson does not disclose a sifter below the swab cup.

The reference to Trainer discloses a sifting device 10 at the end of a pump barrel for the purpose of preventing sand or particles from entering the pumped or the produced fluid.

It would have been considered obvious to one of ordinary skill in the art at the time the invention was made to have provided Ferguson's swabbing tool to include a sifting device below the swab cup in view of Trainer in order to separate out and prevent particulate matter from being produced with the well fluids.

With regard to claim 4, Trainer's sifter 10 includes plural openings 50 to allow lateral flow.

With regard to claims 5, 8 and 9, Trainer's openings appear to be circular. However, it is well known in the art to make well screens with slot-shaped openings and

therefore it would have been obvious to make the opening of any particular shape, size or configuration to suit well conditions.

3. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References by Charles W. Kellett, III and Kenneth Harvard both contain an apparatus that removes particulate matter from fluid.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elton McWilliams whose telephone number is (703) 605-0750. The examiner can normally be reached on Monday through Friday from 6:30AM to 3:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J Bagnell, can be reached at (703) 308-2151. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
